

A Guide to the Seashores of Eastern Africa and the Western Indian Ocean Islands is the essential tool for all visitors to the seashores of the region - from university students in marine sciences to beach wanderers, yacht skippers, snorkelers and SCUBA divers. The seashores and shallow seas of east Africa and the western Indian Ocean islands support an enormous diversity of life. In this book more than 1,600 species of plants and animals from all coastal habitats are presented. Local and international experts have contributed precise descriptions of species and their habitats, together with an authoritative summary of the knowledge of each taxonomic group. 154 pages of beautiful water-color illustrations and numerous detailed line drawings facilitate identification. A wider knowledge of the coastal zone is provided in descriptions of the regions geological history, climate, habitats, human activities and environmental issues.
