Paul Smith presents the text of the first (1867) edition of Bagehot's *The English Constitution*, together with the original conclusion, as well as Bagehot's long introduction to the second edition of 1872. All the usual student-friendly features of the Cambridge Texts series are present, including a concise explanatory introduction, select bibliography and brief biographies of key figures, as well as annotation designed to explain to modern readers some of Bagehot's more arcane contemporary allusions.
