

Del prefacio, L. Testut: No es este libro un tratado didactico, sino, como indica su titulo un simple resumen, lo mas suscinto posible, de las nociones de anatomia descriptiva que constituyen la materia del primer examen del doctorado en Francia. He prescindido de la histologia por doble motivo de que no forma parte del examen precitado y porque en esta coleccion se le destina ya un volumen especial. Lo mismo he de decir de la embriologia y de la anatomia topografica. Tampoco consignare lo referente a las anomalias y a las variaciones anatomicas, pues, aun siendo muy interesantes en morfologia general, tiene un valor secundario para el estudiante que se prepara para sufrir un examen. Reducido a estos limites, escrito por otra parte en el estilo sumamente conciso que conviene a los compendios, sin ilustracion ninguna, ni siquiera figuras esquematicas, este compendio va destinado, no a los que necesitan aprender la anatomia, sino a los que necesitan refrescar la memoria de los que aprendieron ya.
