

Much is being learned about how the brain works by studies of diseases that affect it. This volume portrays aspects of neuroscience today - language development, visual awareness, neuronal plasticity, sensory perception, memory formation - by presenting studies on their normal mechanisms alongside investigations of abnormalities caused by degenerative disease, addiction, developmental errors, and other maladies. In this volume over 80 of the worlds investigators discuss their perspectives.

The Midnight Court, Wales (A Visit to), Murder on the network F, Peirescs History of Provence: Antiquarianism and the Discovery of a Medieval Mediterranean (APS Transaction 101 #3) (Transactions of the American Philosophical Society), Contemporary Medical Terminology, Volume 1: New Edition June 2015,
