Assistive devices are tools, products or types of equipment that help you perform tasks and activities if you have a disability, injury or are a senior. Assistive devices may help you move around, see, communicate, eat, or get dressed/ undressed. Assistive technology or adaptive technology (AT) is an umbrella term that includes assistive devices for people with disabilities. There were wheelchairs in the 17th century. There are standing frames, accessible keyboards, large print, Braille and speech recognition software. Sign language is an assistive technology. Some computer software and hardware is Voice Finger, JAWS, Orca etc. The ibot is a wheelchair that can balance on the its rear wheels, raising the occupant up to around six feet. It can climb stairs. Personal Emergency Response Systems are alarms that summon help if you need it, usually by calling someone on the phone. Web accessibility is a set of guidelines to help disabled people use the internet. There are eye gaze communication boards. Augmentative and alternative communication (AAC) is an umbrella term that encompasses methods of communication for people with restrictions on the production or comprehension of spoken or written language. Assistive Technology for Cognition (ATC) is the use of technology to help with things like attention, memory, self-regulation, navigation, emotion recognition and management, planning, and sequencing activity. A prosthesis, prosthetic, or prosthetic limb is a device that replaces a missing body part. A prosthetic device replaces a body part. Assistive technology is now moving into sports devices, devices like sports wheelchairs that help people participate in sports. We have the Paralympic games. Assistive devices for mobility/ ambulation can also be referred to as ambulatory aids. Ambulatory aids are canes, crutches, walkers, etc. An assistive device could be a wheelchair, reacher, or a disability product that allows you to use a computer. The Assistive Technology Act helps people with disabilities get access to assistive technology devices and services. Some advanced technology products are: Advanced walking aids Assistive computer devices Assistive hearing devices Bath seats Browsing for internet. Computers for disabled people Disability visual aids Eyeglasses For visual impairment, there is screen magnification for monitors, mouse-over speech synthesis browsing, braille gadgets, voice operated phones and tablets. Hand controls driving Hearing aids Household products and aids Internet and email for hearing impaired.
