

This book provides an introduction to human cytogenetics. It is also suitable for use as a text in a general cytogenetics course, since the basic features of chromosome structure and behavior are shared by all eukaryotes. Because my own background includes plant and animal cytogenetics, many of the examples are taken from organisms other than the human. Since the book is written from a cytogeneticist's point of view, human syndromes are described only as illustrations of the effects of abnormal chromosome constitutions on the phenotype. The selection of the phenomena to be discussed and of the photographs to illustrate them is, in many cases, subjective and arbitrary and is naturally influenced by my interests and the work done in our laboratory. The above paragraph from the Preface of the first edition of this book also fits the present edition. However, so much has happened in five years in cytogenetics that—apart from a couple of pages here and there—the whole book has been rewritten and nine new chapters have been added. The system used in the first edition to cite, whenever possible, the latest and/or the most comprehensive review rather than the original publications has been followed here also. Not only would complete literature citations increase the size of the book too much, but many readers have expressed satisfaction with the referencing method used here.

Fundamentals of Biotechnology, Risk, Crisis and Security Management, Poemes, Pieces, Prose: Introduction a l'analyse de textes litteraires francais, New York Grade 4 Test Prep Practice Test Book for English Language Arts: Updated for the April 2014 NY State Tests Common Core Learning Standards in ELA, Neuropsychological Treatment of Dyslexia, An Ocean Free-Lance: From a Privateersmans Log, 1812, De Kleine Engel Eerste Les (Dutch Edition), The Rise and Fall of the Papacy: Delivered in London, A.D. 1701 : With an Appendix Containing Extracts On Prophecy from Mede, Owen, Durham, Willison, &c, A Measure of Failure: The Political Origins of Standardized Testing,
