While creativity is hard to pin down precisely, it's generally considered as the ability to create something using the imagination. Creativity is the act of creating something in the real world, while imagination deals with 'unreal' thoughts that are free from the confines of reality. I remember the exact moment I discovered that imagination was a thing I could do, consciously, and not something that just happens. I was six.

Creativity and imagination are not the same thing. Everything I've learned about imagination over the last very many posts is based on this. Creative imagination definition, See under imagination(def 6). See more. The traditional linking of imagination to creativity invites a number of questions, which have been surprisingly little explored within contemporary philosophical. Stokes argues that imagination is important for even the most minimally creative thought processes. As Stokes notes, few philosophers have thought through the.

Practice imaginative and creative thinking by telling as many stories as you can. Let it be descriptive. Let it allow you and your listener to visualize what is being.
