

The Lewis and Clark Expedition (1803â€“06) systematically recorded weather and climate data during their 4,162-mile journey. This volume collects all such data from their various journals, describes the importance of this first-of-its-kind meteorological undertaking, and includes a color pictorial of the Lewis and Clark Trail. It will serve as a compelling resource for weather, history, and Lewis and Clark buffs alike, as well as for scientists looking back at weather and climate in the early 1800s.

Fuzzbuzz: Storybooks Level 2B: A Remedial Reading Scheme, The Legend Of Sir Perceval: Studies Upon Its Origin Development And Position In The Arthurian Cycle, Fiscal Policy, Stabilization, and Growth in Developing Countries, The Real Reason for Christmas: Letters to Children for the Twelve Nights of Christmas, Finding Church, Bug in a Rug: Reading Fun for Just-beginners,
