

Synopsis: Introducing the concept of Business Intelligence and its implementation with Microsoft Office PerformancePoint Server 2007. First, the book describes the basic understanding of business intelligence such as: ? Definition of Business Intelligence ? Users of Business Intelligence ? Presenting Business Intelligence to consumers ? Success story of Business Intelligence implementation. Once you understand the concept, the book guides you to exercise and implement them by using PerformancePoint Server 2007. Users exercise supervision towards organization through an element in PerformancePoint called Monitoring Server. The processes are: 1. Installing PerformancePoint Server 2007 2. Creating elements in Monitoring Server 3. Installing the elements in a Sharepoint portal. The instructions are arranged in step by step and provided by screen shot illustration to assist readers in using PerformancePoint Server 2007 for Business Intelligence needs in the organization.
