

Webster's bibliographic and event-based timelines are comprehensive in scope, covering virtually all topics, geographic locations and people. They do so from a linguistic point of view, and in the case of this book, the focus is on Social Security Administration, including when used in literature (e.g. all authors that might have Social Security Administration in their name). As such, this book represents the largest compilation of timeline events associated with Social Security Administration when it is used in proper noun form. Webster's timelines cover bibliographic citations, patented inventions, as well as non-conventional and alternative meanings which capture ambiguities in usage. These furthermore cover all parts of speech (possessive, institutional usage, geographic usage) and contexts, including pop culture, the arts, social sciences (linguistics, history, geography, economics, sociology, political science), business, computer science, literature, law, medicine, psychology, mathematics, chemistry, physics, biology and other physical sciences. This data dump results in a comprehensive set of entries for a bibliographic and/or event-based timeline on the proper name Social Security Administration, since editorial decisions to include or exclude events is purely a linguistic process. The resulting entries are used under license or with permission, used under fair use conditions, used in agreement with the original authors, or are in the public domain.

Plato's Theory of Ethics: The Moral Criterion and the Highest Good, Elementary Information Theory (Oxford Applied Mathematics and Computing Science Series), Using Lies As Alibis, Markus Lupertz: Metamorphoses of World History, The Practice of Osteopathy: Designed for the Use of Practitioners and Students of Osteopathy - Primary Source Edition by Carl Philip McConnell (2014-03-13), Nonvascular Plants: Form and Function, Why We Believe the Bible,
