

The result of 40 years of documented research on the Sasquatch. A factual account of a scientist's astounding journey, finally revealing answers to the most perplexing unsolved mystery in modern times. In the summer of 1977, an elderly lady sat quietly reading a book on the porch of her cottage in a densely wooded area in northern Wisconsin. Suddenly, an invisible force sent the book out of her hands onto the porch floor. She heard someone laughing. At the edge of the forest stood the form of a huge ape-like creature with dark auburn hair all over its body. This credible lady continued to have telepathic conversations with the man-creature for four consecutive summers and came to know him as Sasquatch! Is this a rare and unusual event? Not at all. Jack Kewaunee Lapsertis has devoted his life to this research - conducting countless interviews and spending weeks alone in the forest - quietly trying to communicate with them, rather than hunt them. The Psychic Sasquatch provides us with revelations about these gentle creatures and the astonishing truth about their connection with extraterrestrials and why they cannot be found.
