

A career where we feel appreciated, useful and accomplished can bring out our best, and fulfill us in ways that nothing else can. Whether you've been laid off or quit, want to improve a current position, or are ready to embark on a new career path, one of the biggest obstacles to a successful career change is going for what is familiar and safe, rather than bravely going for your true dream or vision--or keeping going when it doesn't arrive right away! This book provides you with a roadmap to clarify what you want, courage to keep taking steps even after rejection, confidence to present yourself in the best possible light, and energy to keep going until you get where you want to go. No amount of information about how to write a resume or cover letter, dress for an interview, negotiate a salary raise, or have a difficult conversation with a co-worker--beats the effectiveness of believing in what you have to offer and not settling for less. There's nothing more effective or magnetic than a woman or man who's clear about their own worth and value. TURN will empower you to take your career into your own hands, and, trust me, it should never be anywhere else. You have more choices, opportunities and power than you know. Let's access them!
